Chief, Regional Office for Europe and Central Asia  
United Nations Office for Disaster Risk Reduction

# 10 years of the Sendai Framework: Overall progress in DRR in the context of sustainable development

## SENDAI FRAMEWORK FOR DISASTER RISK REDUCTION 2015-2030

- Reducing disaster mortality** ●

Mortality in **LDCs, LLDCs and SIDS** is at least **twice** compared to global average.
- Reducing disaster-affected people** ●
- Reducing economic losses** ●

Disaster-related economic losses in **LDCs** are over **six times** the global average
- Reducing damage to critical infrastructure and basic services disruptions** ●
- Increasing national national and local disaster risk reduction strategies** ●
- Enhancing international cooperation and financing for disaster reduction** ●
- Increasing availability and access to early warning systems** ●

# Progress & Peril in proximity

---

# Challenges on locally-led DRR

---

## Limited local capacity

- Lack of the technical, financial, and human resources to implement DRR effectively

## Weak local risk data & analysis

- Insufficient local-level risk baselines, disaggregated data and multi-hazard understanding of risk

## Inadequate inclusion and participation

- Local voices in the DRR planning, esp. women, youth, and Indigenous communities

## Lack of financing and policy support for locally-led DRR

- lack of dedicated funding or legal mandates at national systems for subnational DRR action

## Fragmented implementation

- Local DRR efforts are often uncoordinated / disconnected from national strategies

# The road ahead: Are Cities ready?

---

# Thank you
